Subject index of Volume 130 · 1997

Abuse liability 352
Acoustic startle response 131
Acquisition 213
ACTH 197
Adenosine 334
Adenylate cyclase 124
Adenylyl cyclase 235
Adrenal 368
Adrenergic system 382
α_1 Adrenoceptors 261
α_2-Adrenoceptor 382
Adrenocorticotropic hormone 91
Aggression 203
Aging 276
Alcoholism 404
Alfentanil 222
Allopregnanolone 69
Alternation 334
Amphetamine 2, 79, 183, 343
Animal models 2
Anterodorsal striatum 131
Antipsychotic 249
Anxiety 91, 228
AP-5 131
Apomorphine 109, 387
Appetitive conditioning 213
Atypical 249
Atypical antipsychotic drugs 152
Autoshaping 213
Behavioral reorganization 109
Behavioral sensitization 109, 362
Benzodiazepine 69
Benzodiazepine withdrawal 228
Benzodiazepines 313
Benzodiazepines and sensorimotor disturbances 313
Bicuculline 85
Blood pressure 91
B-Lymphocyte 235
Body weight change 382
Buprenorphine 104, 292
Caffeine 320
CGS8216 313
7-Chlorokynurenate 131
Cholera toxin 235
Chronic decerebrate 375
Classical conditioning 213, 254
Clonidine 382
Clozapine 152, 249
Cocaethylene 222
Cocaine 2, 41, 203, 213, 222, 327
Cognition 276
Conditioned emotional response 79
Conditioned place aversions 327
Conditioned place preferences 327
Continuous cocaine 159, 242
Corticosteroids 368
Cortisol 91, 197
CRF 189
Cross-sensitization 203
Cyclic AMP 235
Cynomolgus monkeys 59
DA release 242
Delayed recall 276
Depotentiation 174
Depression 269
Diazepam and sensorimotor disturbances 313
(±)1-(2,5-Dimethoxy-4-iodophenyl)-2-aminopropane 144
Discriminative stimulus 14
Dizocilpine 334
Dopamine 2, 28, 131, 183, 203, 396
Dopamine antagonist 183
Dopamine D_3 receptors 387
Dopamine (DA) 41
Dopaminergic D_2 receptors 85
Dorsal raphé nucleus 261
Drinking behavior 382
Drug abuse 2, 104
Drug discrimination 41, 59, 292, 387, 404
Drug self-administration 222
DSP4 166
β-Endorphin 197
Ethanol 59, 222
α-Fluoromethylhistidine 362
Food intake 375
Force 249
Forelimb 249
Forskolin 235
Fourth ventricle 375
GABA 85, 285
$GABA_A$ receptor 285
Gaboxadol 285
Gene expression 368
Glucose 197
Glycine 131
Growth hormone 91
Haloperidol 183, 249, 254, 343
Hippocampus 174, 228
Histamine 362
L-Histidine 362
Hormones 69
5-HT cell firing 261
5-HT receptor 368
5-HT receptor subtypes 404
5-HT release 228
5-HT_{1A} 41
5-HT_{1A} receptor 124
5-HT_{1A} receptors 261
5-HT_2 41
5-HT_2 receptor 124
5-HT_3 41
5-HT_3 receptors 159, 242
Human 41, 285
Human subjects 2
Humans 14, 320, 352
3α-Hydroxy-5α-pregnan-20-one 59
Hypnotic 139
Imipramine 124
In situ hybridization 368
Instrumental conditioning 213
Intermediate stage 139
Intermittent cocaine 159
Intracranial self-administration 85
Intra-oral intake 375
Intravenous drug self-administration 396
In-vivo microdialysis 228
Isolation 117
Isoproterenol 235
Latent inhibition 79
Learned helplessness 269
Learning 117, 166, 174, 213, 254
Limbic system 254
Locomotion 183
Locomotor activity 109, 189, 327
Long-term potentiation 174
L-type Ca^{2+} channels 327
m-Chlorophenylpiperazine 144
MDL 100,907 404
Mechanisms 2
Median raphé nucleus 228
Memory 174, 213, 276, 334
Memory for duration 166
Menstrual 69
Menstrual cycle 59
Messenger RNA 368
Mesulergine 144
Metergoline 144
Methamphetamine 362
mGluR 174
Mianserin 144, 382
Microdialysis 203
MK-801 334
Monkeys 276
Mood 197
Morphine 117, 292
Motor activity 303
Mouse 85
Multiple-Choice Procedure 320
Muscarinic 303
Nasal spray 352
Neuroactive steroids 59
Neuroleptics 249
Neurosteroids 59
Nicotine 28, 197, 276, 352, 396
Nicotinic 303
Nimodipine 327
NMDA 131
Nomifensine 222
Noradrenaline 166
Norepinephrine 91
Novelty 109
Nucleus accumbens 131, 189, 203, 242
7-OH-DPAT 387
Ondansetron 159
Operant behaviour 166
Operant conditioning 109
Opioid 292
Opioids 14
Oral stereotypy 189
Paradoxical sleep 139
Pavlovian conditioning 109
Phorbol ester 235
Physical dependence 320
Place preference 104
Place preference conditioning 117
Plasma levels 352
Polydipsia 382
Posttraining 213
Prepulse inhibition 131
Prolactin 91
Prostaglandin E_1 235
Purines 334
Pyrilamine 362

Radial arm maze 174
Raphe neurons 269
Rat 41, 79, 104, 124, 131, 139, 213, 303
Rats 159, 242
β-receptor 124
Reinforcement 28, 320
Reinforcing effects 41
Reinstatement 396
Relapse 396
Reuptake inhibitor 41
Reward 85
Rhesus monkeys 222
Ritanserin 144
Schizophrenia 235, 254, 382
Scopolamine 334
Selective serotonin reuptake inhibitors (SSRIs) 261
Self-administration 28, 41, 203
Sensitization 159, 203
Sensory processing 254
Serotonergic 303
Serotonin 375
Serotonin (5-HT) 41
Serotonin and noradrenaline reuptake inhibitors (SNRIs) 261
Serotonin receptor 368
Serotonin receptors 91
Sertindole 152
Sertraline 124
Single photon emission tomography 152
Sleep state 285
Smoking 197, 352
Social interaction 203
Spatial learning 313
Spectral analysis 285
Spindle 139
Spontaneous recovery 396
Stereotyped behavior 362
Stereotypy 183, 343
Stimulants 327
Stimulus effects 41
Stress 197, 203
Striatum 343
Subchronic 249
Subjective effects 41, 69, 320, 352
Sulpiride 85
Synaptic plasticity 174
Taste aversion 104
Temperature 91
Theta rhythm 139
Time discrimination 166
Tolerance 159, 242, 249
Transdermal 276
Tremor 249
Tricyclic antidepressants (TCAs) 261
Unit activity 343
Vapor inhaler 352
Venlafaxine 261
Ventral tegmental area 85
Water maze 174
Water wheel test 124
WAY-100635 404
Withdrawal 320
Working memory 303
Y-maze 334
Zimeldine 269
Zolantidine 362
Zopiclone 139
